## DURAPLATE™ DIFFUSERS

- Self-Cleaning
- Non-Clogging
- High Oxygen Transfer Rate
- Increases Dissolved Oxygen
- Lifetime Warranty

Both ProLake™ and Solaer® aeration systems utilize Duraplate™ self-cleaning, non-clogging membrane diffusers specifically designed to create a large amount of laminar circulation to eliminate stratification. Duraplate™ diffusers also deliver a very high oxygen transfer rate to increase dissolved oxygen levels at all levels in the pond from the bottom of the pond to the surface.

Duraplate™ diffusers never need to be removed for cleaning like many of the other diffuser designs on the market, and are backed by a lifetime warranty. The rotationally molded Duraplate™ diffuser shell is also fishhook resistant, making them an ideal choice for fishing ponds and lakes. Duraplate™ diffusers also come in dual and quad set-ups for those larger jobs where single compressor layouts just aren't enough.

### Item Number:

40.1100: 9 Inch Duraplate™ Diffuser  
Fits All ProLake™ Aeration Systems

40.1101: 7 Inch Duraplate™ Diffuser  
Fits All Solaer® Solar Aeration Systems

40.1105: Dual Head 9 Inch Duraplate™ Diffuser  
Fits All ProLake™ Aeration Systems

40.1106: Quad Head 9 Inch Duraplate™ Diffuser  
Fits All ProLake™ Aeration Systems

40.1361: 9 Inch Replacement Diffuser Head  
For Duraplate™ Diffusers
