Professional Lake Management Products

PROLAKE™ REMOTE MANIFOLDS

- Consolidates Multiple Airlines In One Box
- Makes Air Control Adjustments More Convenient
- Perfect For Clean & Easy Winter-Time Storage

No power at the shore? No Problem. Now you can take advantage of your existing electric outlets, even long distances from the water, by using our ProLake™ Remote Manifold. ProLake™ Remote Manifolds work up to 4,000 feet away from the aeration unit, allowing you to place your aeration system close to your house, in a storage shed or tucked away from view away from the pond.

It's simple, just run a single airline from the aeration cabinet down to the pond or lake's edge then tie in all the airlines to either our four port manifold or our eight port manifold.

Kit Includes:

A Junction Valve Box

Remote Manifold & Fittings

Fits All ProLake™ & Solaer® Aeration Systems

Item Number:

40.1052: 4 Valve Remote Manifold

40.1053: 8 Valve Remote Manifold
