Closeup of disc membrane which produces fine bubbles

Dual Diffuser

Quad Diffuser

 **Self-Cleaning**

 **Non-Clogging**

 **High Oxygen Transfer Rate**

 **Increases Dissolved Oxygen**

DESCRIPTION

The Duraplate Diffusers feature a shroud and vented design creates a laminar flow, forming a controlled water column to lift, destratify, and aerate the entire water column. This system ensures efficient oxygen transfer, boosting dissolved oxygen levels from the bottom to the surface. Backed by a lifetime warranty.
